

## Company Brief Introduction

### Who We Are & What We Do :

Started the motor business since year 1994, with 10 factories and more than 1800 workers now, we are a professional manufacturer for various types of electric motors. Our main products include:

- |   |  |
|---|--|
| (1) AC Shaded Pole Motors (8 Series)                    | (7) AC & DC Crossflow Blowers, Axial Fans          |
| (2) AC Universal Motors (9 Series)                      | (8) AC & DC Planetary Geared Motors                |
| (3) AC Vacuum Cleaner Motors (12 series)                | (9) AC & DC Spur Geared Motors                     |
| (4) AC Synchronous Motors (18 Series)                   | (10) AC & DC Worm Geared Motors                    |
| (5) AC Capacitor Starting or Running Motors (18 series) | (11) DC Brush Type or Brushless Motors (60 Series) |
| (6) AC External Rotor Motors (2 Series)                 | (12) Other OEM motors.                             |

These motors are widely used in many kinds of home and office appliances, personal care products, power tools, automation equipments, industrial areas, etc. 9 of our 10 factories are ISO9001 certified for quality management system. Many of our products passed the tests for approve of CE, UL, CSA, and VDE.

With a strong engineering team and 20 years of designing and production experiences, we have successfully developed Motorized Impellers adopting External Rotor Motors, High Torque Synchronous Motors, High Torque & Precise AC & DC Geared Motors, Planetary Geared Motors With Needle Bearing System, Energy-Saving Water Pumps, etc. Some of our products are even unique in the world. Most of our products are widely exported to the European and American markets.

**Keeping close cooperation with our customers, being flexible to all our customers' request, being fully responsible for all our actions & words, and considering our customers' profits as our own profits are our main advantages.**

### A Message from the Group CEO :

Dear friends:

We thank you sincerely for your kind attention to our products catalog. Nostop Motor Group is a professional electric motor designer and manufacturer group company. We aim at designing and manufacturing high quality electric motors as you need. We are committed not only to sell our motors, but also bring you the solution! Quality and services are our main advantages.

Our experienced European Engineering Office engineers all have worked in the prestigious electrical appliances companies as electric engineers or R&D engineers. They are willing to work with you together and bring you the corrective and effective solutions.

Our workers are working under scientific management and clear instructions so that there is no worry about any neglecting or out of control during production.

Our sales and services clerk will give you quick response to any of your requests. As a policy in the company, any of your inquiry will be answered in ONE working day.

Quality is always our first mission. We believe, quality comes from what we do, not what we think or measure. So before and during our producing any product, we put quality at the first consideration.

Cost is a critical point in the competition of the market. We take your winning the market as the base of our winning the market, so we always try our best to bring down the cost without bringing down the quality.

Furthermore, we are flexible to discuss any opportunity in case you have the request. We believe that with your kind support and our close cooperation, there is no reason that we couldn't win the game.

Thanks again to your kind interests.

Yours sincerely,

Alfred Stony / Group Chief Executive Officer
